

proliner

CARGO PROTECTION

PROLINER is a thermal blanket solution that is recognized globally for its unique properties. It prevents your goods from various issues such as temperature damage, moisture damage or contamination.

Proliner covers all 6 sides of the container and can be used in both long and short hauls.

Available size:
20 ft & 40 ft

HOW DOES IT WORK?

Proliner reflective material drastically reduces damages caused by extreme temperature fluctuations.

Upon installation, **Calcium Chloride Moisture Absorbers** are strategically placed inside the Proliner prior to stuffing.

INSTALLATION PROCESS:

LINER INSTALLATION →

AFTER STUFFING →

VACUUM PROCESS →

FINISH INSTALLATION
